HS245 Advertising Waste and Recycling Receptacle

Securr Outdoor Advertising Trash Receptacles and Recycling Bins are the perfect choice for public space advertising and recycling programs. Securr fabricates robust yet unobtrusive receptacles using corrosion resistant materials and UV resistant powder coats. Our line of double 45-gallon receptacles can be configured for two trash openings, two recycling openings or one of each! Each receptacle includes two durable rigid plastic liners which are removed from the side to minimize lifting. The advertising panels can be changed in seconds compared to the several minutes it takes using other receptacles on the market. Securr advertising receptacles are also perfectly suited for corporate branding. These can be used in high-traffic areas such as in front of convenience stores, at filling stations, retail outlets, transit systems and sports complexes. The possibilities really are endless!
